SUMMARY

Final-year BS Software Engineering student at FAST-NUCES Islamabad (2026) with 1+ year of experience building full-stack web, mobile, and AI-powered applications. Part-time Software Engineer at Turing Intelligence (Prague). Skilled across MERN, React Native, and applied ML — shipping production systems from a 50-API enterprise ERP to an AI EdTech platform on Google Cloud.

SKILLS

Core Stack: JavaScript (ES6+), TypeScript, React.js, Node.js, Express.js, React Native, Python, FastAPI, NestJS

AI / ML: PyTorch, Whisper ASR, Hugging Face Transformers (BERT, CodeT5), MediaPipe, OpenCV, NLP

Databases: PostgreSQL, MongoDB, MySQL

Cloud & Tools: AWS (EC2, S3, RDS, Elastic Beanstalk), Docker, Git, Redux Toolkit, Tailwind CSS, Postman

WORK EXPERIENCE

Software Engineer (Part-time, Remote) · Turing Intelligence · Prague, Czechia *Jan 2026 – Present*

- Contributing to a system simulation platform based on the M/G/c queue model for backend performance modelling and analysis.
- Built real-time simulation pipelines using WebSockets, enabling live tracking of system metrics (latency, throughput, utilisation).
- Developed full-stack features using React, Node.js, and TypeScript across web and mobile applications.

Web Development Intern · eAccounting360 · Islamabad, PK *Jun 2024 – Aug 2024*

- Developed responsive React.js interfaces and Node.js/Express.js backend services integrated with MySQL.
- Reduced page load time by optimizing database queries and refactoring critical rendering paths.
- Delivered end-to-end MERN features with seamless REST API integration across frontend and backend.

EDUCATION

BS Software Engineering · FAST–NUCES, Islamabad *2022 – 2026 (Final Semester)*

Relevant Coursework: Data Structures & Algorithms · Software Architecture · Machine Learning · Database Systems · Distributed Systems · OS

PROJECTS

Prismora AI — Smart Podcast Summarization Platform | *React Native · Python · FastAPI · Whisper ASR · Hugging Face · OpenCV*

- Final Year Project — built an end-to-end AI pipeline converting podcast URLs into timestamped transcripts, PEGASUS/BART summaries, and auto-generated highlight reels using Whisper ASR, OpenCV, and Elasticsearch; shipped as a mobile app.

SalesCare — Enterprise Service Center ERP | *React.js · Node.js · Express.js · PostgreSQL · Redux Toolkit · JWT · PDFKit*

- Architected a full-stack enterprise ERP with 25+ DB tables, 50+ REST endpoints, role-based access across 4 user roles, automated PDF invoicing, multi-level purchase order approvals, and real-time inventory tracking with a comprehensive audit trail.

Turing Intelligence Platform — Distributed System Simulation Engine | *TypeScript · React 18 · Node.js · PostgreSQL · Redis · Socket.IO · Docker · Kubernetes*

- Built a production-grade Discrete-Event Simulation engine (M/G/c queueing model) with real-time WebSocket KPI tracking, AI-driven bottleneck detection, and end-to-end SaaS deployment via Docker + Kubernetes — currently in active use at Turing Intelligence, Prague.

SlideMind AI — Intelligent Lecture-to-Learning System | *Next.js 14 · FastAPI · Google Gemini 2.5 Flash · PostgreSQL · Docker · Google Cloud Run*

- Built a production AI EdTech platform converting lecture slides (PDF/PPTX) into summaries, topic maps, context-aware chat tutor, and adaptive MCQ quizzes — with a smart caching layer enabling 80k+ Gemini calls per $1, deployed end-to-end on Google Cloud Run.

GadgetPro — Full-Stack E-Commerce Platform | *React.js · Node.js · Express.js · MongoDB · Zustand · JWT · Chart.js*

- Complete MERN e-commerce solution with smart search, wishlist, multi-address checkout, admin analytics dashboard, and Nodemailer email automation. Extended to a cross-platform React Native mobile app with full feature parity.

CERTIFICATIONS

Build a Website on Google Cloud Skill Badge — Google (2026)

AWS Cloud Quest: Cloud Practitioner — Amazon Web Services (2026)

AWS Academy Graduate: Cloud Foundations — Amazon Web Services (2025)

Front-End Development with React — IBM / Coursera (2025)
