SUMMARY

Software Engineer with experience building full-stack applications, including backend APIs, relational databases, frontend interfaces, and cloud-based deployments. Strong understanding of core software engineering principles such as system design, data modeling, API design, and problem solving. Built projects spanning a multi-tenant AI SaaS platform, an enterprise ERP system, and AI-integrated products. Comfortable working across the stack and adapting to different parts of the development process as needed.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL
Backend: Node.js, Express.js, NestJS, FastAPI · REST API design, WebSockets, Server-Sent Events, system design
Frontend: React.js, Next.js 15, React Native, Redux Toolkit, Zustand, Tailwind CSS
Databases: PostgreSQL, MongoDB, MySQL, Redis · Prisma ORM, SQLAlchemy, Sequelize · Row-Level Security, query optimisation
Cloud & DevOps: AWS (EC2, S3, RDS, Elastic Beanstalk), Docker, Kubernetes, Google Cloud Run, Vercel, Git, CI/CD
AI Integration: Whisper ASR, Hugging Face (BERT, PEGASUS), OpenCV, MediaPipe, LLM APIs (Gemini, Groq, OpenAI-compatible)

EXPERIENCE

Software Engineer - Part-time, Remote · Turing Intelligence *Jan 2026 – Present*
Prague, Czechia

- Designed and built a production Discrete-Event Simulation platform end-to-end - system architecture, TypeScript/Node.js backend, PostgreSQL schema, 20+ REST endpoints with JWT auth and RBAC, and a React dashboard with real-time WebSocket KPI streaming.
- Containerised and deployed the full stack via Docker + Kubernetes on a production SaaS environment; set up CI/CD pipeline for continuous delivery - platform now used by engineering teams for pre-deployment infrastructure decisions.

Web Development Intern · eAccounting360 *Jun – Aug 2024*
Islamabad

- Delivered 4 complete MERN features - schema through API through UI - in an 8-week sprint; diagnosed and resolved a MySQL performance regression through query profiling, reducing load time on high-traffic views.

PROJECTS

Ladeway - Multi-Tenant AI SaaS Lead-Qualification Platform *2026*
Next.js 14 · NestJS · TypeScript · PostgreSQL · Prisma · Redis · Groq API (Llama 3)

- Designed and built a production-grade, multi-tenant SaaS platform for a Philadelphia-based logistics client, where configurable AI agents qualify leads via natural conversation with zero hardcoded industry logic.
- Enforced tenant isolation with PostgreSQL Row-Level Security, streamed AI responses via Server-Sent Events, and built a configurable lead-scoring engine feeding a real-time CRM dashboard.

SalesCare - Enterprise Service Center ERP *2025–26*
Node.js · Express.js · PostgreSQL · React.js · Redux Toolkit · JWT · PDFKit

- Full-stack ERP with 25+ relational tables, 50+ REST endpoints, 4-tier RBAC, multi-level purchase-order approval workflows, automated PDF invoicing, real-time inventory tracking, and a complete audit trail.

Prismora AI - Podcast Summarisation Platform | FYP · Grade A *2025–26*
Python · FastAPI · Whisper ASR · BERT · PEGASUS · OpenCV · PostgreSQL · React Native

- End-to-end AI pipeline: audio → Whisper transcription → transformer summarisation → OpenCV keyframe highlight reels, delivered as a cross-platform React Native mobile app with a FastAPI backend.

SlideMind AI - Lecture-to-Learning Platform *2025*
Next.js 14 · FastAPI · PostgreSQL · Google Gemini API · Docker · Google Cloud Run

- Full-stack EdTech platform - PDF/PPTX ingestion, LLM-powered chat tutor, adaptive quiz generation - deployed on Google Cloud Run with a caching layer that cut redundant LLM API calls by ~80%.

EDUCATION

BS Software Engineering · FAST-NUCES, Islamabad *2022 – 2026*
Relevant: Data Structures & Algorithms, Operating Systems, Database Systems, Software Design & Architecture, Computer Networks, Distributed Systems, AI, Machine Learning

CERTIFICATIONS

Develop AI-Powered Solutions with Vertex AI - Google (2026) · Build a Website on Google Cloud - Google (2026) · AWS Cloud Quest: Cloud Practitioner (2026) · AWS Academy Cloud Foundations (2025) · Front-End Development with React - IBM/Coursera (2025) · Blackbird Software Engineering Job Simulation - Forage (2026)
